

ITRAK 365 for Construction

The most scalable and adaptable QHSE software solution for the construction industry

ITRAK 365 is tightly integrated with **Microsoft Dynamics 365, Power BI and Azure**, allowing users to leverage the power and scalability that comes with the Microsoft stack. Our solution allows organizations of any size, to customize the software to their ever-changing workflows, enabling them to be more agile and responsive to operational risks.

Key Benefits for Construction

- Enables worksite safety inspectors to assess buildings, electrical wiring, alarms, emergency lighting, scaffolds, and production equipment
- Facilitates incident reporting and safety meetings on a streamlined platform and provides real-time insights into audit information
- Facilitates real time data entry by the field workforce, allowing management to track the completion of safety tasks
- Assists in conducting vehicle inspections for trucks, trailers, ATV's and other motor vehicles
- Enables various inspections to assess toxic and flammable materials, reducing the risk of exposure

The ITRAK 365 interface is built with your end-user in mind.

Key Capabilities

ITRAK 365 is used to automate a wide variety of QHSE business processes and comes with all the functionality you need to stay compliant in the construction industry.
