ITRAK **365** for **Forestry**

The #1 Safety and Field Operations Power Platform Solution for the Forestry Industry

The ITRAK 365 software solution provides unparalleled visibility into the field operations of Forestry companies. By leveraging the power of your Microsoft infrastructure alongside the comprehensive suite of process flows and safety/operational controls, ITRAK 365 provides companies a proactive way to capture field data and report on field activities to drive productivity and agility into your organization.

Key Benefits

- Enables Log & Timber Quality Control to ensure the final product meets grade standards

- Facilitates Safety Equipment and Saw Dust Inspections to capture potential hazards and guide corrective actions

- Captures data relating to Road Construction Quality to ensure the integrity and usability of roads

- Facilitates Environmental Incident Reporting and provides visibility on the terrain stability, water quality and soil and wildlife management

- Records outcomes of Worker Competency Assessments to ensure workforce can safely and efficiently perform the tasks related to their job roles
