# ITRAK for Forestry

The most scalable and adaptable QHSE software solution for the forestry industry

ITRAK is tightly integrated with **Microsoft Dynamics 365, Power BI and Azure,** allowing users to leverage the power and scalability that comes with the Microsoft stack. Our solution allows organizations of any size, to customize the software to their ever-changing workflows, enabling them to be more agile and responsive to operational risks.

Key Benefits for Forestry

- Enables Log & Timber Quality Control to ensure the final product meets grade standards

- Facilitates Safety Equipment and Saw Dust Inspections to capture potential hazards and guide corrective actions

- Captures data relating to Road Construction Quality to ensure the integrity and usability of roads

- Facilitates Environmental Incident Reporting and provides visibility on the terrain stability, water quality and soil and wildlife management

- Records outcomes of Worker Competency Assessments to ensure workforce can safely and efficiently perform the tasks related to their job roles

The ITRAK interface is built with your end-user in mind.
