

ITRAK 365 for Mining

The #1 Safety and Field Operations Power Platform Solution for the Mining Industry

The ITRAK 365 software solution provides unparalleled visibility into the field operations of Mining companies. By leveraging the power of your Microsoft infrastructure alongside the comprehensive suite of process flows and safety/operational controls, ITRAK 365 provides companies a proactive way to capture field data and report on field activities to drive productivity and agility into your organization.

Key Benefits

- Supports the Worker Competency Validation process to ensure that the workers can safely and efficiently perform the tasks related to their job role
- Provides the tools necessary to ensure compliance with industry regulators and assists in expediting the mine operational timelines
- Enables mining companies to manage the permitting process for large scale explorations by providing Automated Workflows and Notifications
- Enables tracking of Environmental Hazards that come from open-pit, underground, In situ leach and other forms of mining
- Facilitates Environmental Incident Reporting and provides visibility on erosion, water discharge, waste management and environmental contamination
