

# ITRAK 365 for Transportation

The most scalable and adaptable QHSE software solution for the transportation industry

ITRAK 365 is tightly integrated with **Microsoft Dynamics 365, Power BI and Azure**, allowing users to leverage the power and scalability that comes with the Microsoft stack. Our solution allows organizations of any size, to customize the software to their ever-changing workflows, enabling them to be more agile and responsive to operational risks.

## Key Benefits for Transportation

- Enables better safety practices around the aircraft engine and the cargo hold and assists in performing risk assessment associated with poor weather conditions and noise
- Assists in the evaluation of contractor and employee competency, certifications and qualifications
- Assists in truck and other motorized vehicle inspections
- Enables better safety practices in dock operations, ensuring that high risk areas are structurally safe
- Enables risk assessments to be completed to ensure container ships are equipped with suitable platforms and are loads adequately secured and safely lifted by crane
- Enables ISO 15401 compliance in shipyards to help foster higher quality levels and reduce dangerous ship building practices

The ITRAK 365 interface is built with your end-user in mind.

## Key Capabilities

ITRAK 365 is used to automate a wide variety of QHSE business processes and comes with all the functionality you need to stay compliant in the transportation industry.
