ITRAK 365 for Utilities

The #1 Safety and Field Operations Power Platform Solution for the Utilities Industry

The ITRAK 365 software solution provides unparalleled visibility into the field operations of Utilities companies. By leveraging the power of your Microsoft infrastructure alongside the comprehensive suite of process flows and safety/operational controls, ITRAK 365 provides companies a proactive way to capture field data and report on field activities to drive productivity and agility into your organization.

Key Benefits

- Assists in maintaining service quality throughout the supply chain

- Assists with proactively managing electric utility hazards, such as electrocution, falls, confined spaces, fires and explosions

- Enables better safety practices and ensures regulatory compliance

- Increases operational effectiveness and minimizes the potential for service disruptions

- Helps to reduce workplace accidents and maintain a positive public perception
