

ITRAK 4.16 Release

RELEASE SUMMARY

To upgrade to ITRAK 4.16, you must be on ITRAK 4.12 or higher and the Microsoft Dynamics 365 CE environment must be at 2020 Release Wave 1 or higher.

Supported Web Browsers

- Internet Explorer 11
- Microsoft Edge (supported on Windows 10)
- Mozilla Firefox (latest publicly-released version) running on Windows 10, Windows 8.1, Windows 8, or Windows 7
- Google Chrome (latest publicly-released version) running on Windows 10, Windows 8.1, Windows 8, Windows 7
- Apple Safari (latest publicly-released version) running on the two latest publicly-release Mac OS versions

NEW FEATURES

- Microsoft Teams Integration – added the ability to embed the ITRAK forms area into a Teams Tab.
- Created new Activities area that shows grids of CRM Tasks, Form Tasks, and Training Tasks. Additionally, the views for each grid are loaded for view switching.
- Added in new ability to have Form Type Field instructions be hidden by an icon using the Show Instructions field.

ENHANCEMENTS

- Renamed the Activities Area to Dashboard regarding the ITRAK 365 Portal.
- Improved the ITRAK 365 Portal attachment control to automatically upload documents after selection
- Added portal logo and branding colors to the External Portal User pages

BUG FIXES

- Corrected an issue where sometimes the datetime fields were not being loaded correctly on the Read Only page.
- Corrected an issue where sub-grid reorder buttons were causing an error when used in a model driven app using UCI(D365 Unified Interface).
