President and Founder of  
Chemscape Safety Technologies  
and Deerfoot Consulting

# Hazardous chemicals are an enormous management challenge for industrial companies

**Compliance**  
**Risk Mitigation**  
**Sustainability**  
**Liability**

**Reputation**  
**Operational goals**  
  
**Insurance**

**Worker health**  
  
**Permits**

**You have a large inventory of chemicals**

- + Used by multiple employees**
- + In multiple work processes**
- + Across a range of locations**

**= You have extreme complexity and continual risk**

**Every day there is the potential for a serious incident that can inflict irreversible damage on your worker health and the corporate reputation.**

**You have countless lurking details to stay on top of -**

**Potential to derail daily operations as well as major projects and result in severe regulatory consequences**

- **SDS Management**
- **Chemical Storage**
- **Labelling**
- **Training**
- **Physical Hazards**
- **Health Hazards**
- **Transportation**
- **Environment**

- **Waste Management**
- **Emergency Planning**
- **Occupational Health**
- **PPE**
- **Chemical Inventory**
- **Hazard Assessments**
- **Job Planning**
- **Procurement**

**In order to protect workers and maintain efficient operations, you need to stay on top of -**  
**A Mass of Information & Ever-changing Regulations**

- **Compliance**
- **Permits**
- **Reporting**
- **Operations**
- **Hazard Communication**
- **Risk Assessment**

**You need time, tools, and knowledge to keep on top of your chemical management:**

**You need to information that is readily accessible, easy to understand and practical.**

Chemscape has tools to help you **reduce** health risks and **prevent** chemical-related work delays.

sdsBinders 

- SDS Management
- Mobile

 **CHAMP**

- Hazard Identification
- Risk Assessments
- Chemical Approvals
- Recommended Controls
- Training Courses

# Technology simplifies compliance

- **Immediate Access To Chemical Safety Information**
- **Save Time Finding SDSs.**
- **Confidence in the Compliance of your SDS inventory.**
- **Save Time with SDS Management**
- **Solid Foundation for Chemical Handling.**

**Understanding your chemicals begins with knowing their hazards. Ideally you would have the guidance of an onsite industrial hygienist – just not practical. Until now.**

**CHAMP – Chemical Intelligence System** A ground breaking, interactive chemical intelligence system from Chemscape. Designed by an elite team of industrial hygienists, CHAMP gives you **24/7 expert guidance** on a host of chemical management issues. Go from SDS Management to Chemical Management

# 24/7 Interactive Guidance on Demand

If a new chemical comes onsite, CHAMP will immediately let you know what protection is needed, or if it should be used at all. This is one example of a SmartChart® downloadable every day / task

chemscape			HEALTH RISK						
PRODUCT NAME	PRODUCT USE								HEALTH RISK
AQUAGUARD 211 Guardian Chemicals, Inc.	CORROSION CONTROL	<	Central Nervous System, Eyes, Kidneys, Liver, Respiratory System, Skin Absorption, Skin Harm						Central Nervous System, Eyes, Kidneys, Liver, Respiratory System, Skin Absorption, Skin Harm
CALCIUM, LIME & RUST CLR Zap Inc / Amrep, Inc	Cleaner	<							Eyes, Skin Harm
CORRSHIELD MD4159 SUEZ Water Technologies & Solutions Canada (formerly GE Water & Process Technologies)	corrosion inhibitor/deposit control agent.		D44	YES		Eyes, Kidneys, Liver, Respiratory System, Skin Absorption, Skin Harm			
Methanol Recochem Inc.			D360	YES		Central Nervous System, Eyes, Repro-Developmental, Respiratory System, Skin Absorption, Skin Harm			
Strip-it-All Trelkwest Solutions Inc.	Paint stripper		C28	NO		Blood, Central Nervous System, Eyes, Hematopoietic System, Kidneys, Liver, Lymphoid System, Respiratory System, Skin Harm			
MINIMUM EXPOSURE CONTROLS									

If a vendor tries to sell you a new chemical product, **CHAMP** will instantly tell you if it **is safe to bring on site** and **what protective measures are needed**, or if it **is too toxic** to even consider.

**Keep routine maintenance and plant turnarounds on schedule – CHAMP lets you plan to prevent risk to avoid crippling delays**

If a regulator ordered you to provide a list of all the products that contained a particular substance, where would you start? With all of the products you have on site, how many days, weeks or months would it take to provide the answer?

**CHAMP gives you the answer in seconds.**

# Have a plan to measure success

**Meet regulations – CHAMP**  
lets you create custom  
exposure control plans for  
your worksites in minutes,  
without having to hire a  
high-priced consultant

ECP Focus – Ammonia

Hazard and Health Risk

Ammonia (NH3) is a colorless gas with a strong, sharp, irritating odor which can be detected by most people even in small amounts. Ammonia is a very important industrial chemical, which can be used as a refrigerant and in the production of fertilizers, plastics, synthetic fibers, dyes, explosives, pharmaceuticals and detergents.

Ammonia gas is non-flammable, but air mixtures (16-25%) can explode if ignited, so it is treated as flammable. When stored as compressed gas or liquefied gas, it may explode if heated.

Ammonia is toxic if inhaled. It causes severe irritation of the nose and throat and can cause life-threatening accumulation of fluid in the lungs. Ammonia is also corrosive, the gas/vapor will irritate or burn the skin/eyes. The liquefied gas can chill or freeze the skin/eyes (frostbite) on contact.

Some examples of workers at risk of being exposed to ammonia include the following:

- Agricultural workers who use soil fertilizer
- Farmers working around compost piles, manure pits releasing ammonia gas
- Industrial workers who manufacture fertilizers, rubber, nitric acid, urea, plastics, fibers, synthetic resin, solvents and other chemicals
- Workers in petroleum refining, mines and metallurgy
- Workers in a refrigerant unit in food processing, chemical production, ice making systems etc.
- Cleaners using ammonia-based solutions

This following table provides a summary of products that contain ammonia – **CA5# 7664-41-7, 1336-21-6.**

Product	Supplier	Concentration Range	OEL

This ECP sets out the practices for preventing worker exposure and applies to employees, temporary employees, and visitors of **company name**.

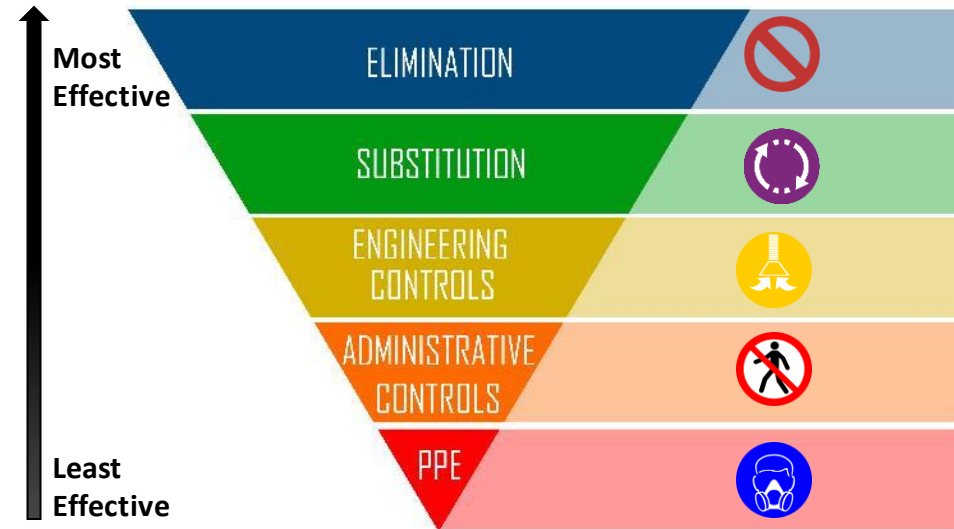

Exposure and Potential Health Risks

Ammonia

## Gain Insight

**Master control over all the hazardous chemicals at your worksite. Cut the complexity. Reduce the risk.**

**HIERARCHY OF CONTROLS**

## ITRAK and Microsoft Integrations with Chemscape

### Chemscape and ITRAK are built on Microsoft; both solutions support SSO through Azure AD

- Launch into sdsBinders/CHAMP and specific SDS documents from ITRAK using Microsoft Azure AD
- Schedule and manage training in ITRAK and complete in CHAMP
- Run chemical MOC processes in ITRAK
- Perform inspections in ITRAK to manage compliance with the identified chemical hazards and controls in CHAMP
